SALE at 1.00pm

To be held at
Dungannon Farmers Mart
Granville Road, Dungannon, Co. Tyrone. BT70 1NJ
Tel: 028 8772 2727

General Information & Sale Notes

DARD RESTRICTIONS All vehicles must be disinfected thoroughly before arrival at the market. This applies to both vendors and purchasers. Any vehicles not properly cleansed will not be allowed entry into the market.

MOVEMENT LICENCE It is up to each individual to have applied for their Movement Licence. These will be required for inspection on arrival at Dungannon Mart.

ARRIVAL Sheep may arrive from 7.00am. Any prior arrangements can be made with Dungannon Mart.

INSPECTION All sheep will be inspected by the Society's Official Inspector before being allowed forward for sale. **All sheep must have been paint branded with their lot number prior to inspection.** Inspection will be from 8.30am - 10.00am

METHOD OF SALE All sheep will be sold in guineas.

CONDITIONS OF SALE All sheep will be sold subject to the Conditions of Sale of the British Charollais Sheep Society and to the Auctioneer's General Conditions of Sale, which are available in the Auctioneer's office.

PEDIGREE CERTIFICATES Pedigree certificates relating to the sale will be available from the Auctioneer's office on the day of the sale. See note below with regard to Notified Males.

PEDIGREE STATUS FOR MALES Would purchasers please note that there are two different status of registration for Charollais rams, Full Pedigree and Birth Notified. All full pedigree rams are marked as such in the catalogue and have been upgraded by the breeder, all other rams have notified status only. No pedigree certificates are issued for notified rams and these rams are not eligible for use within a pedigree flock until they are upgraded to full pedigree status. If full pedigree status is required then a fee of £20.00 plus VAT is payable to the Society.

ERRORS OR OMMISIONS The Auctioneers and Society **CAN ACCEPT NO RESPONSIBILITY** for any errors or omissions printed in the catalogue

SCRAPIE GENOTYPE RESULTS The Scrapie Genotype results listed in this catalogue are guaranteed to be correct by the person whose name appears as the Vendor in the catalogue. Whilst the Society will make all possible effort to provide purchasers with the correct information, they can in no way be held responsible for any error or omission of information.

EBV A brief explanation...

Eight week weight	The breeding potential for lamb growth rates from birth to 8 weeks of age.
Mature size	Choosing animals with high figures for this trait will increase mature size.
Litter size	Selection on high EBVs will increase the prolificacy of female replacements.
Maternal ability	This is the maternal component of the 8-week measurement. The higher this figure the better a ram's ewe lambs will perform as mothers (i.e. milking ability).
Scan weight	The breeding potential for lamb growth rates to 21 weeks (age at scanning). The selection of breeding stock with high scan weight EBVs will result in animals with heavier carcasses at a constant fat class or leaner carcasses at a constant age.
Muscle depth	Choosing animals with high muscle depth EBVs will increase lamb musculature and hence the lean meat content of the carcass.
Fat depth	Negative values indicate animals with lower fat content which will produce leaner carcasses or which can be taken to higher weights without becoming over-fat.
Lean weight	Breeding value predicting yield of lean meat in the carcass (EBV only produced for breeds involved in CT scanning).
Fat weight	Breeding value predicting yield of fat in the carcass (EBV only produced for breeds involved in CT scanning).
Gigot	Breeding value highlighting animals with superior breeding potential for gigot shape (EBV only produced for breeds involved in CT scanning).
FEC	Breeding potential for worm resistance, a negative number being preferable (EBV only produced for breeds involved in FEC sampling).
Index	Highlights superior breeding stock for a specific breeding objective.
