# General Information & Sale Notes

**ARRIVAL** All sheep must be in the market not later than 9.00 am on the morning of the sale. Sheep may be delivered on Thursday evening after 7.30pm. They are left overnight in the market at the risk of the vendor.

**MOVEMENT LICENCES** All vendors must hand in a completed General Movement Licence and a current Sheep & Goat Health Scheme certificate.

**The market holding number is 83/536/8300**

Intending purchasers should have their CPH number ready to complete the correct movement license before departure from the market.

**INSPECTION** All sheep will be inspected by the Society's Official Inspector before being allowed forward for sale. All sheep must have been paint branded with their lot number prior to inspection.

**METHOD OF SALE** All sheep will be sold in guineas.

**CONDITIONS OF SALE** All sheep will be sold subject to the Conditions of Sale of the British Charollais Sheep Society and to the Auctioneer's General Conditions of Sale, which are available in the Auctioneer's office.

**PEDIGREE CERTIFICATES** All sheep entered for the sale have Full Pedigree status. Pedigree certificates relating to the sale will be available from the Auctioneer's office on the day of the sale.

**SCRAPIE GENOTYPE RESULTS** This catalogue lists the results where provided of the Scrapie Genotype. Whilst the Society will make all possible effort to provide purchasers with the correct information, they can in no way be held responsible for any error or omission of information.

**MAEDI VISNA** All sheep are from Maedi Visna Accredited flocks. Prospective purchasers wishing to join the scheme should consult the Sheep & Goat Health Schemes, P.O. Box 5557, Inverness, IV2 4YT. Tel: 01463 226995 before the arrival of sheep onto their premises.

**BIOSECURITY** Intending purchasers are requested to have livestock vehicles cleansed and disinfected. Vendors will be required to wash out their livestock vehicles after unloading.

**SUBSTITUTE ENTRIES** Details of substitute entries will be available on sale day. Any such sheep will be marked with a red dot next to their lot number. All substitutions must be made to the BCSS office by 12 noon Monday 9th August.

### EBV A brief explanation...

Eight week weight	The breeding potential for lamb growth rates from birth to 8 weeks of age.
Mature size	Choosing animals with high figures for this trait will increase mature size.
Litter size	Selection on high EBVs will increase the prolificacy of female replacements.
Maternal ability	This is the maternal component of the 8-week measurement. The higher this figure the better a ram's ewe lambs will perform as mothers (i.e. milking ability).
Scan weight	The breeding potential for lamb growth rates to 21 weeks (age at scanning). The selection of breeding stock with high scan weight EBVs will result in animals with heavier carcasses at a constant fat class or leaner carcasses at a constant age.
Muscle depth	Choosing animals with high muscle depth EBVs will increase lamb muscularity and hence the lean meat content of the carcasse.
Fat depth	Negative values indicate animals with lower fat content which will produce leaner carcasses or which can be taken to higher weights without becoming over-fat.
Lean weight	Breeding value predicting yield of lean meat in the carcasse (EBV only produced for breeds involved in CT scanning).
Fat weight	Breeding value predicting yield of fat in the carcasse (EBV only produced for breeds involved in CT scanning).
Gigot	Breeding value highlighting animals with superior breeding potential for gigot shape (EBV only produced for breeds involved in CT scanning).
FEC	Breeding potential for worm resistance, a negative number being preferable (EBV only produced for breeds involved in FEC sampling).
Index	Highlights superior breeding stock for a specific breeding objective.
