Held under the Auspices of the British Charollais Sheep Society Ltd

RUTHIN

FRIDAY

17TH SEPTEMBER 2010

Show 10.30am - Sale 12 noon

90 - HEAD - 90

1 Older Ram 32 Shearling Rams

53 Ram Lambs

4 Shearling Ewes

All from MV Accredited flocks

Auctioneer: Glyn Owens

Ruthin Farmers Auction Co Ltd

Market Street, Ruthin, Clwyd. LL15 1AU

Tel: 01824 705000/702025 Fax: 01824 705555

General Information & Sale Notes

ARRIVAL All sheep must arrive in the market not later than 9.30am on the day of the sale.

IDENTIFICATION All sheep must have been identified with their individual BCSS identification in accordance with current BCSS rules. All sheep must also have a tag with their UK holding number.

INSPECTION All sheep will be inspected by the Society's Official Inspector before being allowed forward for sale. All sheep must have been paint branded with their lot number prior to inspection.

BIOSECURITY Intending purchasers are requested to have livestock vehicles cleansed and disinfected.

LICENCES Vendors are responsible for obtaining their movement licences prior to the sale. The Market Holding Number is 56 78 8008

MAEDI VISNA All vendors must ensure that a fully completed MV certificate accompanies their sheep to the sale.

METHOD OF SALE All sheep will be sold in guineas.

CONDITIONS OF SALE All sheep will be sold subject to the Conditions of Sale of the British Charollais Sheep Society and to the Auctioneer's General Conditions of Sale, which are available in the Auctioneer's office.

PEDIGREE CERTIFICATES Pedigree certificates relating to the sale will be available from the Auctioneer's office on the day of the sale. See note below with regard to Notified Males.

PEDIGREE STATUS FOR MALES Would purchasers please note that there are two different status of registration for Charollais rams, Full Pedigree and Birth Notified. All Full Pedigree rams are marked as such in the catalogue and have been upgraded by the breeder, all other rams have Notified status only. No Pedigree Certificates are issued for Notified rams and these rams are not eligible for use within a pedigree flock until they are upgraded to Full Pedigree status. If Full Pedigree status is required then a fee of £20.00 plus VAT is payable to the Society.

SCRAPIE GENOTYPE RESULTS The Scrapie Genotype results listed in this catalogue are guaranteed to be correct by the person whose name appears as the Vendor in the catalogue. Whilst the Society will make all possible effort to provide purchasers with the correct information, they can in no way be held responsible for any error or omission of information. **VENDORS ARE RESPONSIBLE FOR PASSING THE GENOTYPE CERTIFICATES FOR THEIR SHEEP ON TO THE PURCHASERS.**

EBV A brief explanation...

Eight week weight	The breeding potential for lamb growth rates from birth to 8 weeks of age.
Mature size	Choosing animals with high figures for this trait will increase mature size.
Litter size	Selection on high EBVs will increase the prolificacy of female replacements.
Maternal ability	This is the maternal component of the 8-week measurement. The higher this figure the better a ram's ewe lambs will perform as mothers (i.e. milking ability).
Scan weight	The breeding potential for lamb growth rates to 21 weeks (age at scanning). The selection of breeding stock with high scan weight EBVs will result in animals with heavier carcasses at a constant fat class or leaner carcasses at a constant age.
Muscle depth	Choosing animals with high muscle depth EBVs will increase lamb muscularity and hence the lean meat content of the carcasse.
Fat depth	Negative values indicate animals with lower fat content which will produce leaner carcasses or which can be taken to higher weights without becoming over-fat.
Lean weight	Breeding value predicting yield of lean meat in the carcasse (EBV only produced for breeds involved in CT scanning).
Fat weight	Breeding value predicting yield of fat in the carcasse (EBV only produced for breeds involved in CT scanning).
Gigot	Breeding value highlighting animals with superior breeding potential for gigot shape (EBV only produced for breeds involved in CT scanning).
FEC	Breeding potential for worm resistance, a negative number being preferable (EBV only produced for breeds involved in FEC sampling).
Index	Highlights superior breeding stock for a specific breeding objective.
