# General Information

**ARRIVAL** All sheep must arrive in the market between 7.00 a.m. & 8.00am on the sale day - in time for scanning and inspection.

**IDENTIFICATION** All sheep must have been identified with their individual BCSS identification in accordance with current BCSS rules. All sheep must also have a tag with their UK holding number.

**INSPECTION** All sheep will be inspected by the Society's Official Inspector before being allowed forward for sale. All sheep must have been paint branded with their lot number prior to arrival in the market.

**BIOSECURITY** Intending purchasers are requested to have livestock vehicles cleansed and disinfected. Please be aware of current regulations at time of sale.

**LICENCES** Vendors are responsible for obtaining their movement licences prior to the sale. **The Market Holding Number is 10463 8000**

**MAEDI VISNA** All vendors must ensure that a fully completed MV certificate accompanies their sheep to the sale, except for those in the Non-MV section.

**METHOD OF SALE** All sheep will be sold in guineas.

**CONDITIONS OF SALE** All sheep will be sold subject to the Conditions of Sale of the British Charollais Sheep Society and to the Auctioneer's General Conditions of Sale, which are available in the Auctioneer's office.

**SCANNING RESULTS** All ewes will have been scanned on the day and the results will be available on sale day. This in no way guarantees the number of lambs at birth. If any female sheep which is described in the catalogue or at the time of sale as being "scanned in lamb" or in lamb proves not to have been in lamb at the time of sale and within 7 days after the day of sale the Purchaser gives written notice to the auctioneers of his intention to return the animal supported by a veterinary surgeon's certificate that such sheep has proved not to have been in lamb then the purchaser may return such sheep to the vendor.

## **PEDIGREE & SCRAPIE GENOTYPE CERTIFICATE**

Pedigree Certificates will be available at the Auction Mart Office on the day of the sale. All sheep in the sale are Full Pedigree Registered.

**SCRAPIE GENOTYPE RESULTS** The Scrapie Genotype results listed in this catalogue are guaranteed to be correct by the person whose name appears as the Vendor in the catalogue. Whilst the Society will make all possible effort to provide purchasers with the correct information, neither they nor the auctioneers can in any way be held responsible for any error or omission of information.

EBV	A brief explanation
Eight Week Weight	The breeding potential for lamb growth rates from birth to 8 weeks of age.
Scan Weight	Choosing animals with high figures for this trait will increase mature size.
Muscle depth	Choosing animals with high muscle depth EBVs will increase lamb muscularity and hence the lean meat content of the carcass.
Fat Depth	Negative values indicate animals with lower fat content which will produce leaner carcasses or which can be taken to higher weights without becoming over-fat.
Gigot	Breeding value highlighting animals with superior breeding potential for gigot shape (EBV only produced for breeds involved in CT scanning).
Index	Highlights superior breeding stock for a specific breeding objective.
