## FLOCK DETAILS

DATE FLOCK ESTABLISHED : 1990

NUMBER OF EWES : 220

### BRIEF DESCRIPTION OF THE FLOCK

Well established flock concentrating on breeding for terminal sire muscling traits. We have been amongst the highest index flocks in the breed for many years, and our rams are consistently right at the very top on muscling traits measured through a CT scanner. In recent years we have moved to a more commercial management system, producing yearling rams from forage diets, whose progeny will perform without expensive inputs. sheep are expected to perform on a similar management regime to our commercial flock with only myself providing labour for 750 ewes (and increasing) lambing.
