**Sale of
COMMERCIAL
CHAROLLAIS RAMS & EWES**

Held under the Auspices of the Charollais Sheep Society
Ltd

CARLISLE

FRIDAY 31st AUGUST 2018

15 Adult & Shearling Rams

13 Ram Lambs

26 Ewes, Shearling Ewes & Ewe Lambs

All from MV Accredited flocks

Show - 9.00 am

Sale - 10.30 am

Auctioneers:

Harrison & Hetherington

Borderway Mart, Rosehill, Carlisle CA1 2RS

Tel: 01228 406200 Fax: 01228 406201

General Information & Sale Notes

ARRIVAL All sheep must arrive between the hours of 7.00am and 9.00am on the day of the sale. All sheep must have been identified with their individual BCSS number and have their UK Tag Number. Also all rams must have been paint branded with their lot number prior to arrival in the market.

INSPECTION All sheep will be inspected by the Society's Official Inspector before being allowed forward for sale.

BIOSECURITY Intending purchasers are requested to have livestock vehicles cleansed and disinfected.

LICENCES Vendors are responsible for obtaining their movement licences prior to the sale. The Market Holding Number is 08 067 0141-01

MAEDI VISNA All vendors must ensure that a fully completed MV certificate accompanies their sheep to the sale.

METHOD OF SALE All sheep will be sold in guineas.

MINIMUM SELLING PRICES General minimum selling prices will apply to all sales held under the auspices of the British Charollais Sheep Society. The minimum selling prices for this Sale are as shown below:-

Rams, Senior/Shearling - 300 gns	Ram lambs - 250 gns
Empty Ewes - 200gns	Empty Shearling Ewes - 250gns
Ewe Lambs - 200gns	

CONDITIONS OF SALE All sheep will be sold subject to the Conditions of Sale of the British Charollais Sheep Society and to the Auctioneer's General Conditions of Sale, which are available in the Auctioneer's office.

PEDIGREE CERTIFICATES Pedigree certificates relating to the sale will be available from the Auctioneer's office on the day of the sale. See note below with regard to Notified Males.

PEDIGREE STATUS FOR MALES Would purchasers please note that there are two different status of registration for Charollais rams, Full Pedigree and Birth Notified. All full pedigree rams are marked as such in the catalogue and have been upgraded by the breeder, all other rams have notified status only. No pedigree certificates are issued for notified rams and these rams are not eligible for use within a pedigree flock until they are upgraded to full pedigree status. If full pedigree status is required then a fee of £20.00 plus VAT is payable to the Society.

SCRAPIE GENOTYPE RESULTS The Scrapie Genotype results listed in this catalogue are guaranteed to be correct by the person whose name appears as the Vendor in the catalogue. Whilst the Society will make all possible effort to provide purchasers with the correct information, they can in no way be held responsible for any error or omission of information. **VENDORS ARE RESPONSIBLE FOR PASSING THE GENOTYPE CERTIFICATES FOR THEIR SHEEP ON TO THE PURCHASERS.**

Scan Weight	8.64	10.09	11.40	12.18	13.64
Muscle Depth	3.13	3.78	4.37	4.73	5.39
Fat Depth	0.07	0.38	0.66	0.83	1.14
Gigot	2.61	3.60	4.48	5.01	6.01
Terminal Sire Index	305	339	371	389	424

EBV	A brief explanation
Eight Week Weight	The breeding potential for lamb growth rates from birth to 8 weeks of age.
Scan Weight	Choosing animals with high figures for this trait will increase mature size.
Muscle depth	Choosing animals with high muscle depth EBVs will increase lamb muscularity and hence the lean meat content of the carcasse.
Fat Depth	Negative values indicate animals with lower fat content which will produce leaner carcasses or which can be taken to higher weights without becoming over-fat.
Gigot	Breeding value highlighting animals with superior breeding potential for gigot shape (EBV only produced for breeds involved in CT scanning).
Index	Highlights superior breeding stock for a specific breeding objective.

CLEAN SWEEP

OPTIMISE HEALTH THROUGH NUTRITION

Supports animal performance & complements effective parasite control programmes

- ✓ 25kg mineral, trace element and vitamin tub
- ✓ Suitable for cattle and sheep

Unique nutritional product launched at NSA Welsh Sheep

Rumenco has launched an innovative, new nutritional health product designed to help support existing, effective worm management programmes, at this year's NSA Welsh Sheep event.

Clean Sweep, is a supplementary feed bucket based on the natural active ingredient Diature™. Rumenco's technical manager, David Thornton explains, "The inclusion of this

alternative ingredient helps keep on top of worm burdens, where control strategies are already in place, while the overall bucket formulation supports a balanced nutritional intake."

The risk of performance losses in cattle and sheep is a real threat as anthelmintic resistance becomes an increasing challenge in tackling on-farm parasite issues.

"Both sub clinical and clinical worm burdens have the potential to have big knock on effects to cash flow.

"Rumenco have identified a unique, alternative physical method that supports existing worm control programmes and also helps reduce the risk of parasite resistance occurring," says Mr Thornton.

"The mode of action of Diature™ is the key factor of Clean Sweep which helps maintain low worm burdens in cattle and sheep," he says.

"It's comprised of components called diatoms – hard shelled algae deposits. The structure of diatoms means they naturally adhere to the waxy cuticle of intestinal worms, and subsequently interfere and kill parasites by dehydration.

"Due to its physical action, parasites can't acquire resistance to diatomaceous earth," adds Mr Thornton.

On-farm research, supported by Rumenco, has shown that lambs supplemented with Clean Sweep as part of a grazed grass diet, had lower faecal egg counts; significantly better daily live weight gains; cleaner fleeces; and improvements in foot health, compared to lambs fed a control diet.

"The results from the research are very significant. Clean Sweep is an exciting addition to Rumenco's growing nutritional health range.

"It's designed to complement existing, strategic parasite control programmes by helping to support a low worm burden in cattle and sheep over the summer grazing season.

"I'd recommend offering the buckets ad lib, at a ratio of one bucket per 10 to 15 head of cattle, or 35 sheep," says Mr Thornton.
