Tullyear Flock Introduction

Well it is finally happening, Drew has given in to part with some of his precious sheep. All sheep offered for sale are from our top Breeding Families to include all of this years hoggets which scanned in-lamb plus several top drawer two Shear Ewes we retained from last year.

The Tullyear Flock was established in 1986, the theory being that we would keep a few ewes as a diversion from our dairy herd!!

Our first Charollais came from the Flock of Andrew and John Mackie, we then purchased a few French imports from Jim Quail. Over the years we have always purchased quality sheep which are true to Charollais type with good muscle, long loin and a tight skin and of course they have to have that bit of style. This policy seems to have worked well as our sheep are always in demand, they sell well and buyers keep coming back for more.

One of our proudest occasions was winning the National Flock Competition in 2005. We have also won our own Regional Flock Competition ten times.

All ewes have been vaccinated for both Enzootic and Toxo. We are confident that you will be impressed with the sheep that we have forward.

THOMPSONS

FEEDING INNOVATION

As lambing season nears, it's a good time to review dietary protein levels, since udder development and milk supply are particularly sensitive to protein nutrition.

If your forage is low in protein, feeding Thompsons' Super Hi-Lamb Ewe Nuts for the next 2-3 weeks will correct the protein shortfall at the critical stage of pregnancy, when there is a spurt in lamb development and the ewe requires key nutrients.

For further help and advice, contact Thompsons' Technical Team or your local sales representative.
