buyer's breeding ewes and found them to be in normal responsible breeding condition and not in the aforementioned incapacity then the buyer may return the animal to the seller.

(ii) The animal shall be deemed incapable of natural and effective service if it fails to make at least one ewe pregnant during the male guarantee period under natural breeding conditions and is so certified as being incapable by veterinary surgeons certificate aforementioned. The Society recommends that the veterinary surgeon follows the "Guidelines on the examination of rams for breeding" and also the "SVS Examination Certificate" as issued by the sheep Veterinary Society.

(iii) The buyer shall during the male guarantee period give the animal full and sufficient opportunity to prove that he is capable of natural and effective service.

***Members and all those handling sheep are reminded of the need to act responsibly and with animal welfare in mind whenever handling sheep. With many Society events now being streamed live or filmed for later publication it is important that Society members take care to ensure they present a responsible and ethical image of the sheep industry at all times. Of particular note is the handling of sheep in show and sale rings and the use of crooks to display sheep in sale rings at major sales. The use of crooks is at the owner's discretion, but should only be done to aid the movement of sheep around the sale ring and to showcase the animal. Excessive use of crooks to push or beat sheep is to be avoided***
